Expert in Water Management

Technical Data

Model of pump	PP108S17
Type of pump	Diesel
Width	1950mm
Length	3600mm
Height	2050mm
Dry weight	5300kg
Inlet diameter	10 inch (250mm)
Outlet diameter	8 inch (200mm)
Solids handling	89mm diameter
Engine	Scania DC13 074A 257kW
Maximum flow	1400m ³ /hr (390 l/s)
Maximum dynamic head	110m
Maximum operation speed	1800rpm
Best Efficiency Percentage	80%
Priming Vacuum Capacity	50cfm
Medium	Water, Waste Water

PP108S17 Diesel Pump Specification

The PP108S17 is a high volume and high head diesel surface pump ideal for your projects.

The PP108S17 is also suitable for use on sewage bypass works as pump is capable to handle 89mm solids in diameter.

It offers pumping capacity up to 390 L/s, discharge head up to 110m.

With the inbuilt mechanically driven diaphragm vacuum system and an air removal capacity of 50CFM, this pump has self priming capabilities.

The pump offers a high level of fuel efficiency bring fuel saving to your project.
